For the tougher applications

VOLVO FMX ELECTRIC

The Volvo FMX Electric is here to make everyday operations run even smoother with a minimal CO₂ footprint. It's the strong, silent type; built for efficiency with a truly robust exterior, and designed to operate in the harshest environments, on road and off road.

The range to cover your needs

We tailor the range of your Volvo FMX Electric for your applications and your routes.

Plenty of load capacity

Manage gross combination weights up to 50 tonnes or 65 tonnes (on application) on pure electric power with zero tailpipe emissions.

A comfortable workplace

Regardless of which of the five cab options you choose, you get a comfortable and quiet workplace with outstanding ergonomics.

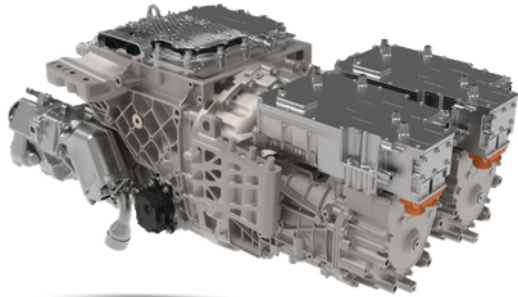

Always charged

You can charge the batteries using a DC fast charger rated up to 350kW from 20% to 80% in approximately 60 minutes.

BENEFITS

- ⊕ Five cab options to suit your operation
- ⊕ 540 kW continuous power
- ⊕ Range up to 470 km
- ⊕ Proven record in delivering real-world solutions
- ⊕ Expertise that matches your daily transport challenges
- ⊕ One point of contact for all your electromobility needs

Battery capacity

Depending on your range needs and your chassis specs, you can get your Volvo FMX Electric with five to six battery packs. It gives you a useable energy storage of 360–540 kWh.

State-of-the-art cabs

You can choose between five different cab sizes for your Volvo FMX Electric. They all offer lots of space, excellent visibility and great comfort for long work days. As with all Volvo trucks, these cabs are tested under the most extreme conditions.

Your electric driveline

The electric driveline utilises two electric motors and Volvo Trucks' state of the art powershift transmission to use the energy in the most efficient way. It means you have up to 540 kW of continuous power. Offering an instant torque that makes driving easy.

Power made useful

Developed for a range of applications the electrical power take-off (ePTO) delivers reliable electric power with easy body builder access, making integration simple and efficient.

Services for your uptime

The Volvo FMX Electric is made to help you keep your promises. Our Volvo Gold Electric Service Contract covers your complete truck giving you access to everything you need to minimise the risk of unplanned stops.

Range and route support

Our productivity services let you optimise the range for your transport applications and your routes. Range optimisation means you get just the right battery capacity for your transport applications.

The **range and route** service supports you all the way from planning to completion of your applications and routes.

Stay in charge

Based on your operation, we will provide guidance to find a solution that suits your charging needs.
